

Approve a staged Spain + Czechia envelope

Spain first; Czechia only after demand, cost and FX validation.

YEAR-ZERO CAPEX

€225,000

€225,000 remains under the capex ceiling.

DIRECT HUB STAFF

5 FTE

Spain: 3. Czechia: 2. Two FTE remain.

BASE ANNUAL INCREMENT

€198.1k

After €95,000 recurring fixed cost; 1.14-year payback.

Conditional board choice

Best low/base/high economics under the supplied assumptions. Combined stress stays positive, but Czechia alone loses €37.8k. Reserve capital now; release it at evidence gates.

Sources: [S06](#), [S12](#). Calculations: saved order ledger / metrics.json.

The decision starts with €2.03m existing contribution

Country differences reflect units, prices, mix, credits and FX; every market has 209 eligible orders.

2025 contribution before hub costs

Sources: S08, S09, S07, S11, S14, S02, S03. Calculations: saved order ledger / metrics.json.

GROUP NET SALES

€4.384m

1,254 orders • 77,436 shipped units

Spain + Czechia account for 40.4% of contribution and 35.7% of units. Their observed margins are 49.6% and 48.7%.

No service-level or lost-order evidence is supplied. The analysis cannot prove a hub will cause growth.

Data corrections change what the board should count

Every extract page and correction file is reconciled; zero-price shipments are retained.

Orders	Rows / IDs
Raw rows	1,328
Duplicates / superseded	13 / 18
Selected order IDs	1,297
Cancelled / test / future	24 / 18 / 1
Eligible orders	1,254

12 free orders / 739 units stay in the baseline. Their contribution is –€14,565.90. Only 481 of 1,081 returned units recover product cost.

Returns	Rows / IDs
Raw rows	264
Duplicates / superseded	20 / 1
Selected return IDs	243
Late / orphan excluded	1 / 1
Eligible return IDs	241

31 January return included; 1 February return excluded. Orphan ABSENT is quarantined, with no guessed currency or join. All 24 blank shipment dates are cancelled orders.

Sources: S08, S09, S07, S11, S14, S02, S03. Calculations: saved order ledger / metrics.json.

Market scale is context, not product demand

Official World Bank archives: 2022–2024; revised 2026 vintage.

Market	2024 population, m	2022–24 change	2024 GDP/person, US\$
DEU	83.52	0.41%	56,104
FRA	68.55	0.54%	46,103
NLD	17.99	1.65%	67,465
POL	36.56	-0.71%	25,104
CZE	10.91	2.18%	31,828
ESP	48.85	2.22%	35,327

Spain and Czechia grew fastest by population; Poland contracted. Germany is largest and the Netherlands has highest nominal GDP/person, yet neither leads the base hub economics.

Current US\$ is not PPP or real income. No missing requested values. WB lastupdated: 13 July 2026; archive retrieved: 27 September 2026. Full 2022–2024 values are retained.

Sources: [S10](#), [S05](#), [S13](#). Calculations: saved order ledger / metrics.json.

Spain and Czechia lead standalone base returns

Full annual contribution after recurring fixed cost; €k. Capex is a separate year-zero investment.

Hub	Capex	FTE	Low	Base	High	Stress	Base payback
DEU	280	5	-34.0	10.1	54.2	-13.6	27.75 yr
FRA	210	4	-19.5	27.1	73.7	3.1	7.74 yr
NLD	140	3	10.8	64.2	117.6	37.6	2.18 yr
POL	110	3	25.4	83.6	141.8	-40.7	1.32 yr
CZE	95	2	31.5	95.4	159.3	-37.8	1.00 yr
ESP	130	3	33.2	102.7	172.3	70.0	1.27 yr

Model: $C \times \text{uplift} + \text{units} \times (1 + \text{uplift}) \times \text{saving/unit} - \text{annual fixed cost}$. Uplifts are 10% / 25% / 40%; these are assumptions, not measured responses to a hub.

Stress: extra refunds = 3% of gross sales; PLN/CZK haircut = 10% of net sales; apply to 1.25× volume against unchanged normal baseline. No extra cost recovery.

Sources: [S06](#), [S12](#). Calculations: saved order ledger / metrics.json.

Czechia + Spain leads all three volume cases

18 feasible alternatives evaluated: six singles, eleven pairs and defer. Four pairs exceed resource limits.

Portfolio	Capex €k / FTE	Low €k	Base €k	High €k	Stress €k
CZE+ESP	225 / 5	64.6	198.1	331.6	32.2
POL+ESP	240 / 6	58.6	186.3	314.1	29.3
NLD+ESP	270 / 6	44.0	166.9	289.9	107.6
ESP	130 / 3	33.2	102.7	172.3	70.0
DEFER	0 / 0	0.0	0.0	0.0	0.0

Closest base alternative: Poland + Spain

It earns €11.8k less a year, needs €15k more capex and one more FTE, and is weaker in all four prescribed cases. Czechia + Spain leaves resources unused without sacrificing modeled return.

No synergy, cross-border demand transfer or capacity benefit is assumed for any pair.

Sources: [S06](#), [S12](#). Calculations: saved order ledger / metrics.json.

A downside-first board could choose Netherlands + Spain

The recommended pair is not the best portfolio under every risk preference.

Annual increments

Netherlands + Spain

€31.2k less base contribution
€75.5k more stress contribution
€45k more capex; one more FTE

Czechia + Spain stress payback extends to 6.99 years. Spain alone has €70.0k stress contribution and 1.86-year stress payback.

Sources: S06, S12. Calculations: saved order ledger / metrics.json.

Validate savings and the volume response before release

All six assumed savings per unit exceed the fulfillment costs recorded in the exports.

CZECHIA: SAVING / COST

€2.10 / €1.52

Spain: €3.00 assumed saving versus €1.63 recorded cost.

ZERO UPLIFT, FULL SAVINGS

—€24.4k

Recommended pair loses annually without volume growth.

NO SAVINGS BREAK-EVEN

11.60%

Required pair volume uplift; low case then loses €13.1k.

Decision-changing thresholds

Czechia uplift below 22.24% lets Poland + Spain overtake if Poland stays at 25%. A Czech net-sales FX haircut above 2.60%, with the 3% refund shock, favors Netherlands + Spain. These are one-way model thresholds.

Sources: [S06](#), [S12](#), [S02](#). Calculations: saved order ledger / metrics.json.

Stage the 90 days around evidence gates

Owners are proposed. No site, customer or service diligence has yet been performed.

Days / owner	Action and dependency	Release gate
1–15 CFO + Finance	Reconcile data; define cost pool; baseline service and returns.	Zero unexplained differences; fully loaded cost definition.
16–30 COO + Procurement	Quotes, route trial and qualified pipeline; cost the pilot.	Spain $\leq$ €130k / 3 FTE; defensible low case; board release.
31–60 Spain lead + IT	Site, staff, inventory and systems ready after approval.	$\geq$ 95% one-day dispatch; $\geq$ 99% inventory accuracy; traceable returns.
61–90 CFO + COO / Board	Observe Spain; refresh Czech cost, demand and FX case.	Czechia $\leq$ €95k / 2 FTE; reassess NLD or retain Spain only.

Do not promise two live hubs by day 90. Recruitment, sites, integration and working capital are unverified; unbudgeted startup needs must stop release until funded.

Sources: [S06](#), [S12](#). Calculations: saved order ledger / metrics.json. Timeline and gate targets are consultant proposals.

Approve the envelope, retain control of each release

Reserve €225,000 and five FTE; launch Spain first, with Czechia conditional.

Finance owns economics

Monthly reconciled contribution after full hub cost.
Target full-run-rate increments: Spain €102.7k; Czechia €95.4k. Stop expansion if the rolling eight-week annualized increment is negative.

Operations owns service and returns

Daily dispatch and stock accuracy. Weekly return rate and restock disposition, compared at the same cohort age. Validate net savings through invoices; track actual cash FX separately.

Board resolution proposed

Release funds only after cost, demand and readiness gates. Re-submit Netherlands + Spain if the downside case dominates; retain Spain only or defer when the evidence fails. These scenarios are not causal estimates or a full discounted cash-flow model.

Sources: [S06](#), [S12](#). Calculations: saved order ledger / metrics.json. KPI targets are proposed; report and workbook contain the audit trail and full limitations.
