

Approve Spain; gate Czechia

DECISION REQUEST

Authorize a staged €225k / 5 FTE ceiling for Spain + Czechia. Commit Spain first; release Czechia only after a day-60 commercial and operating review.

ANNUAL BASE GAIN

€198,099

After recurring hub fixed cost

YEAR-ZERO CAPEX

€225,000

€225k below board ceiling

SIMPLE PAYBACK

1.14 years

Undiscounted base case

Decision strength: modeled, conditional. The stress case leaves €32,180/year and a 6.99-year simple payback.

The 2025 cohort supports a focused screen

RESOLVED CLIENT ACCOUNTING

1,254 eligible orders • 77,436 shipped units • €4.384m net sales • €2,030,010 contribution

209 eligible orders in every market; contribution differences reflect units and economics, not an observed order-count gap. [C1, A1]

CZE+ESP wins the client volume cases

ANNUAL INCREMENTAL CONTRIBUTION AFTER RECURRING COSTS

CZE+ESP BASE €198,099 STRESS €32,180 Capex €225,000 5 FTE 1.14y payback	POL+ESP BASE €186,329 STRESS €29,264 Capex €240,000 6 FTE 1.29y payback	NLD+ESP BASE €166,931 STRESS €107,630 Capex €270,000 6 FTE 1.62y payback	ESP BASE €102,716 STRESS €70,007 Capex €130,000 3 FTE 1.27y payback	DEFER BASE €0 STRESS €0 Capex €0 0 FTE Defer
---	---	--	---	--

Eleven of 15 pairs are feasible under ≤€450k capex, ≤7 FTE and ≤2 hubs. Full pair and single screens are in the workbook. [C2, A2]

Stress changes the second-hub choice

TRADE-OFF AND FLIP CONDITION

CZE+ESP BASE / STRESS

€198k / €32k

€225k capex • 5 FTE • stronger low/base/high

NLD+ESP BASE / STRESS

€167k / €108k

€270k capex • 6 FTE • strongest stress

CZE costs €45k less and yields €31k more annual base contribution; NLD protects €75k more annual contribution in the defined stress.

Switching condition: ~29.2% of the defined joint stress bundle erases Czechia's second-hub advantage over the Netherlands. This is a sensitivity threshold, not a forecast probability.

Make the second commitment earned

90-DAY IMPLEMENTATION GATES

0–15

COO + Finance

Reconcile ledger; approve Spain charter and spend ceiling.

GATE: Signed plan; €0 ledger difference

16–30

Spain operations

Quote site/3PL, carrier routing and reverse logistics.

GATE: Cost and saving check

31–60

Spain + Commercial

Pilot dispatch; test Czechia carrier and order economics.

GATE: ≥95% on-time; ≥98% scans

61–90

CFO + board sponsor

Scale Spain; release CZE, choose NLD or defer.

GATE: Revised economics and risk gate

Owners are proposed roles. Day-60 evidence can validate operating economics; it cannot prove the annual uplift. [A2]

Manage the value drivers visibly

KPI AND RISK CONTROLS

Dispatch

On-time dispatch $\geq 95\%$ weekly

Spain lead

Unit savings

Verify €3.0/Spain and €2.1/Czechia per unit

Finance

Returns

Returned units and refund/gross by sale cohort

Finance + Quality

Contribution

Monthly run-rate net of recurring fixed cost

CFO

Data quality

Unmatched IDs quarantined; €0 reconciliation

Data lead

Largest uncertainty: assumed uplift and savings. Use actual routing, cost, return and FX evidence before Czechia capex release. [A2]

Decision conditions and evidence

BOARD RECORD

Authorize: Spain launch now; up to €95k Czechia only after the day-60 gate. Keep NLD+ESP as the defined-stress fallback and preserve the right to defer.

Evidence states

Computed: 2025 ledger, scenario arithmetic, feasibility. Observed public archive: 2022–24 World Bank and 2025 ECB. Assumed: 10/25/40% uplift, per-unit savings, fixed costs and stress. Missing: actual cash FX, site quotes, route baseline, customer demand validation.

Source key: [C1] synthetic order/return/cost files; [C2] synthetic hub options; [A1–A2] client rules; [P1–P2] archived World Bank; [E1] archived ECB. Full URLs, hashes and vintages: [evidence/source_register.csv](#).

The modeled choice is conditional, not statistically proven or causal. Preserve cutoff and orphan-return quarantine when refreshing the case.
