

Fund Spain first; gate Czechia at day 90

Authorize up to two hubs, but release the second commitment only after pilot evidence and an updated return/FX assessment.

PAIR BASE INCREMENT

€198k / year

after recurring fixed cost

YEAR-ZERO CAPEX

€225k

5 FTE; within board limits

JOINT STRESS

€32k / year

6.99-year simple payback

Day-90 CZE gate

Release €95k only if updated annual increment >€47.5k and operations/FX checks pass.

The 2025 base is profitable but synthetic

Source: reconciled client exports [S1-S4]. Same 209 eligible orders in each market is a synthetic pattern.

Revisions and returns materially change the base

1,328

raw order rows across both pages and corrections

1,297

distinct order IDs after 13 identical repeats and 18 superseded rows

1,254

eligible 2025 shipments after 24 cancelled, 18 test and one 2026 shipment

241

eligible return IDs after 20 repeats, one revision, one late and one orphan

Twelve valid zero-price shipments stay in units/orders. One orphan return is quarantined.
Refunds use the original sale month; only physically restocked units recover COGS.

The pair leads base, low and high cases

Option	Low €/yr	Base €/yr	High €/yr	Stress €/yr	Capex	FTE
CZE+ESP	65k	198k	332k	32k	225k	5
POL+ESP	59k	186k	314k	29k	240k	6
POL+CZE	57k	179k	301k	-79k	205k	5
NLD+ESP	44k	167k	290k	108k	270k	6
ESP	33k	103k	172k	70k	130k	3
DEFER	0k	0k	0k	0k	0k	0

Uplift assumptions: 10% / 25% / 40%. Stress: 25% uplift + 3% gross refund shock;
 PLN/CZK also lose 10% of net sales. Simple annual arithmetic, not a demand forecast.

Stress changes the preferred pace

CZE+ESP BASE

€198k / yr

1.14-year payback

CZE+ESP STRESS

€32k / yr

6.99-year payback

ESP ONLY STRESS

€70k / yr

1.86-year payback

Why stage the second hub

CZE's own annual increment falls from +€95k base to -€38k under joint stress.

POL+ESP is the next highest base pair (+€186k), but uses €15k more capex and one more FTE; its stress result is +€29k.

NLD+ESP leads stress at +€108k, with €45k more capex than CZE+ESP.

If CZE stress persists, defer it and reassess NLD or stay with ESP alone.

Stress is a conservative assumption with no assigned probability; it is not observed 2026 performance.

Use 90 days to turn assumptions into gates

0–30

COO + FP&A

Sign ESP cost envelope; validate data, site and SKU capacity.

Gate: ≤€130k capex, 3 FTE

31–60

ESP ops + IT

Set up inventory, routing, returns and parallel reconciliations.

Gate: Controls and test orders pass

61–90

COO + CZE lead

Pilot ESP; measure returns; hold CZE option; screen NLD fallback.

Gate: CZE >€47.5k/yr, <2yr payback

Weekly KPIs: on-time dispatch ≥95%; inventory accuracy ≥98%; refund rate, unit savings, restocking and contribution per shipment cohort. Reforecast monthly for two quarters.
