

Fund two sites in stages

Approve Czechia + Spain within €225k capex / five FTE; open Spain first and gate Czechia at day 90.

BASE ANNUAL INCREMENT

€198.1k

Highest feasible pair

SIMPLE PAYBACK

1.14 years

At modeled steady state

JOINT STRESS INCREMENT

€32.2k

Material FX / returns exposure

Decision condition: if the board requires stressed payback ≤ 3 years, choose Netherlands + Spain instead.

The 2025 base is reconciled

Raw order rows **1,328**

Distinct latest IDs **1,297**

Eligible shipped orders **1,254**

Shipped units **77,436**

Conservative accounting

Latest revisions replace whole orders. Cancelled (24), test (18) and one 2026 shipment are excluded. Twelve zero-price shipments stay in the base. One orphan return is quarantined; one late return is excluded.

Gross sales – refunds – net COGS – nonrefundable fulfillment = contribution.
Cash settlement and actual bank FX are outside this extract.

Spain and Czechia lead the baseline

Observed 2025 contribution is a sizing anchor, not evidence that a local hub causes more demand.

Base upside versus joint-stress resilience

Choice	Base €/yr	Stress €/yr	Capex	FTE	Payback
CZE+ESP	€198.1k	€32.2k	€225.0k	5	1.14y
POL+ESP	€186.3k	€29.3k	€240.0k	6	1.29y
NLD+ESP	€166.9k	€107.6k	€270.0k	6	1.62y
POL+CZE	€179.0k	€-78.6k	€205.0k	5	1.15y

Low/base/high uplift: 10% / 25% / 40%. Stress: base uplift plus extra refunds and PLN/CZK depreciation. Scenarios are assumptions, not forecast probabilities.

The alternative protects the downside

CZECHIA + SPAIN

€198.1k base

€32.2k stress • €225k capex • 5 FTE

NETHERLANDS + SPAIN

€166.9k base

€107.6k stress • €270k capex • 6 FTE

The chosen pair gains €31.2k/year in the base case, saves €45k capex and one FTE; it concedes €75.5k/year under the defined joint stress.

Context is not a demand forecast

Market	Population change 2022–24	GDP/head 2024 (current US\$)
DEU	0.4%	\$56,104
FRA	0.5%	\$46,103
NLD	1.7%	\$67,465
POL	-0.7%	\$25,104
CZE	2.2%	\$31,828
ESP	2.2%	\$35,327

Archived World Bank series; no missing 2022–2024 cells. Population and current-dollar GDP/head do not establish replacement-assembly demand.

Release capital through measurable gates

0–30 days

COO + Finance

Freeze baseline; secure Spain facility/carrier quotes; review compliance and inventory controls.

31–60 days

Spain operations

Pilot limited-SKU routing; track on-time delivery, stock availability, unit savings and refunds.

61–90 days

COO + CFO

Decide Czechia release $\leq \text{€}95\text{k}$ / 2 FTE from revised base, return, FX and capacity evidence.

Proposed pilot gates: $\geq 95\%$ on-time delivery, $\geq 98\%$ availability, positive unit savings; Czechia release requires board acceptance of revised stress exposure.
